ABSTRACT

This document is a continuation of the series in which the Office of Education presents general management data on the libraries of individual institutions of higher education. Statistics for 2,122 individual college and university libraries are provided. Since this is a partial listing of college and university libraries, the data are not necessarily representative and should not be used to obtain aggregates of any type. A report containing analytic or summary tables for all college and university libraries will be published later. This report is composed of the following tables: (1) number of units in library collections and holdings per full-time equivalent student in college and university libraries, by institution; (2) operating expenditures of college and university libraries, estimated value of nonbudgeted support services, and expenditure ratios, by institution; (3) library staff, vacant positions, and hours of assistance in college and university libraries, by institution and (4) number and mean salary of full-time staff in college and university libraries, by type of position, term of employment, and institution. The questionnaire form used is reproduced as the appendix. The Fall 1968 issue of "Library Statistics of Colleges and Universities. Analytic Report" is available as ED 039 888. (NH)

FOREWORD

This report continues the series in which the Office of Education presents general management data on the libraries of individual institutions of higher education. In order to provide data of use to administrators, librarians, and others, this report containing statistics for 2,122 individual college and university libraries is now being issued.

Inasmuch as this is a partial listing of the college and university libraries, with inclusion based on timely submittal of a report and its completeness, the data are not necessarily representative and therefore should not be used to obtain aggregates of any type. A second report containing analytic or summary tables for all college and university libraries will be published at a later date.

The information contained in this report was collected as part of the Higher Education General Information Survey. The cooperation of numerous individuals and groups concerned with academic library statistics made this publication possible. Their assistance is greatly appreciated by the U.S. Office of Education.

INTRODUCTION

This report contains statistics on college and university library collections and on operating expenditures for the 1968-69 school year, as well as data on staff and salaries for fall 1969. These data are shown for the 2,122 individual libraries whose reports could be fully edited and processed in time for inclusion here.

For the purposes of this survey, each institution of higher education was asked to consolidate the data for all of its library units, including libraries in branches, extension centers, and research installations. If an institution returned separate reports for components within its library system, the data were combined into a single report.

Tables and definitions

In tables 1 through 4, institutions are listed alphabetically within each State; "U.S. Service Schools" and institutions in outlying areas are shown at the end of each table. Each institution is identified by control (public or private) and by type of institution as follows:

U -- University
FG -- Four-year institution, with graduate students
FN -- Four-year institution, no graduate students
T -- Two-year institution

Table 4, which contains salary data for the full-time library staff, has been structured differently from the other tables. One, two, or three lines may be shown for each institution depending upon whether the term of employment of the staff member is 9-10 months, 11-12 months, or contributed service (C.S.), i.e., service contributed without pay or with payment in kind, usually in religious or theological institutions.

In all tables, brackets in the margin show institutions that make up a cluster or "system" of institutions. Each institution within a system has its own identity as an institution, in addition to its identification with the system. Problems of classifying institutions in systems and computerizing the listing have occasioned difficulties with the alphabetic sequencing of the institutions' names. If the name of an institution is not found in its expected (alphabetic) position in the list, the reader should also see whether the institution appears in one of the bracketed sets of names in the given State. Also, although the names of some universities are printed with the name of the State first (e.g., ALA ALL CAMPUSES U OF), such universities are usually placed near the end of the State list at the

point where they would appear if the institution's usual designation had been used (i.e., UNIV OF ALA ALL CAMPUSES).

Publicly controlled institutions are those administered by local or State governments, as well as a few in which administrative control is by the Federal Government. All other institutions, including religious or theological, independent nonprofit, and a few profit-making schools, are classified as privately controlled.

Institutions are classified as universities if they (a) give considerable stress to graduate instruction, (b) confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and (c) have at least two professional schools that are not exclusively technological. These criteria are the same as those utilized in previous reports in this series.

Four-year institutions other than universities are not subdivided (as in earlier reports) into specialized schools or colleges. From the standpoint of library administration, it seems sounder to use a two-way breakdown, namely, the institutions which do (FG), and those which do not (FN), have graduate programs, that is, programs of academic work beyond the baccalaureate level.

Two-year institutions are those offering programs of at least 2, but less than 4 years of college-level work. This definition is also the same as the one previously employed and is synonymous with the term "junior college" or "community college."

For purposes of estimating an institution's full-time-equivalent enrollment, the total number of graduate students (including both full-time and part-time) was added to the total full-time resident undergraduates, plus one-third of the part-time resident and extension students. This formula was also used for the fall 1968 report.

Volumes are defined as physical units of any printed, typewritten, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which had been classified, cataloged, or otherwise prepared for use. Thus the volume count includes bound periodicals and cataloged Government documents, but excludes all microform. The latter was obtained separately, as a count of microfilm reels plus the number of physical units of other forms of microtext (microcards, microprints, and microfiche units).

Periodicals are defined as publications issued in parts that usually contain articles by several contributors; they generally have distinctive titles, and the successive numbers or parts are intended to appear at stated intervals, usually for an indefinite period. Periodicals are thus distinguished from such other serials as monographs, newspapers, annuals, proceedings, transactions, yearbooks, and recurring reports.

In addition to operating expenditures for 1968-69, each library was asked to report the estimated value of nonbudgeted support services, i.e., items which, although not charged to the library's accounts, constituted library materials or

services. These included free binding service at the institution's or a State printing plant, automation services provided by the institution's centralized computer installation without charge to the library, student assistance in the library under the (Federal) College Work-Study Program, and any other nonbudgeted library materials or services except rent or maintenance service.

In the computation of total library operating expenditures as a percent of total institutional expenditures for educational and general purposes, the latter figure encompassed all expenditures made by the institution for instruction, departmental research, and organized research.

Professional librarians are defined as staff members doing work that requires training and skill in the theoretical or scientific aspects of library work, as distinct from its mechanical and clerical aspects.

Other professional staff are defined as personnel who, though not professional librarians, are in positions normally requiring at least a bachelor's degree.

Nonprofessional staff are defined as personnel in receiving, shipping, storing, secretarial duties, etc. (excluding maintenance personnel); i.e., library staff whose duties do not require a knowledge of the theory of library work.

Data for all library and institutional staff are in terms of full-time equivalents, as also are data on vacancies, which were collected in this survey for the first time in several years.

In reporting salaries of full-time staff, respondents were given the option of restricting use of their salary figures to summary or analytic tables in which salaries paid by individual institutions are not identifiable. Consequently in the salary data of this report (table 4), the symbol "R" is shown in place of the salary figure wherever the respondent asked that the figure be so restricted. (The restricted figures are utilized in the summary tables of the analytic report.)

Inasmuch as libraries with relatively high salaries tend to impose the restriction more often than those with low salaries, the unrestricted salary figures appearing in table 4 do not give a fully representative picture of salaries actually paid. For large institutions a fair idea of the relative salary level paid by one institution as compared with another can be gained by dividing the salary expenditure (col. 4 of table 2) by the full-time equivalent of library staff (sum of cols. 3-5 in table 3). Statistically, this quotient does not represent a true mean salary, but is simply an index of relative salary levels;

this is because the salary expenditures in table 2 are for 1968-69, while the staff in table 3 are the personnel on duty in fall 1969. Also, some allowance should be made when an institution's ratio of professional to nonprofessional staff is markedly atypical. However, these considerations rarely make a significant difference so far as large institutions are concerned, so that, for such institutions, the index may be used with some confidence in connection with budget-making and related operations.

In all tables the symbol "NA" indicates that the respondent did not supply a clear or unambiguous entry, or left the item blank.

Further details regarding definitions and other features of the survey are indicated in the questionnaire and accompanying instructions (see appendix).

EXPLANATIONS AND INSTRUCTIONS

In this form, basic data are requested on the collections, staff, expenditures and salaries in college and university libraries. The compilations of these data have proved to be valuable tools for administrators, chief librarians, and others concerned with the improvement of library services in higher education. The data will also be used in the administration of Title II of the Higher Education Act and other programs sponsored by State and Federal agencies.

The following changes have been made in the questionnaire since last year:

A. RECLASSIFICATION. Information concerning the status and salary of the Chief Librarian or Director of Libraries has been combined with similar items for the rest of the staff.

B. OMITTED ITEMS:
1. Interlibrary transactions
2. Budgeted expenditures for current year
3. Beginning salary data

C. NEW ITEM: Staff [illegible]

GENERAL INSTRUCTIONS

A. TIME PERIODS COVERED. The data concerning library collection (Part I), hourly assistance (Part II), and library expenditures (Part III) should be reported for your fiscal year 1968-69. In Part IV, the expenditure data for your institution are likewise for fiscal year 1968-69. Data on staff in both Part IV and Part V are for the fall term 1969.

B. LIBRARY UNITS COVERED. Report consolidated data for ALL of the library units in your institution, including libraries in branches, extension centers, and research installations. If it is necessary to omit any library unit(s), please give name and location in Item 5. It is particularly important that this form include data on library services in organized or separately budgeted research ("R & D") centers, and that the total expenditures and professional staff of such centers be included in Part III.

C. NEED FOR ESTIMATES. If exact information is not available for an item, PLEASE ENTER AN ESTIMATE for the requested figure. If data are available for a combination of items but not for each component, enter an estimate for each component. Then, except for the salary table (Part V, Lines 23-28), mark them on the form circled above (o) as appropriate figure, (b) as "E" for check boxes, or (c) "0" when the quantity to be reported is nothing or zero. DO NOT LEAVE ANY ITEM BLANK.

D. If you have questions or need more copies of the form, please phone Mrs. Doris Holladay, Area Code 202, 963-7756.

SPECIFIC INSTRUCTIONS

PART I - LIBRARY COLLECTION, 1968-69

A. For reporting purposes, a VOLUME is a physical unit of any printed, typewritten, handwritten, mimeographed or processed work contained in one binding or portfolio, hardbound or paper bound, which has been classified, cataloged, or otherwise prepared for use. Include BOUND periodical volumes. Include Government documents that have been classified and cataloged, counting as a volume such material as is contained in one binding or portfolio. Depository libraries should ordinarily include documents classified in accordance with the Superintendent of Documents classification.

B. All forms of microtext (including microfilm) are to be included from Lines 3-6, but ARE TO BE REPORTED SEPARATELY on Lines 4 and 7. If the number of reels or other units of microtext are not separately available in your records, please estimate their number for purposes of providing aggregate data here.

C. For Line 8, a PERIODICAL is defined as a publication issued in parts that usually contain articles by several contributors. It generally has a distinctive title and the successive numbers or parts are intended to appear at stated intervals, and usually for an indefinite period. On Line 9 report OTHER SERIALS, including newspapers, yearbooks, annual reports, published/ series, monographic series, and serial proceedings and transactions of societies. Please provide estimates in accordance with these definitions if exact data are not available.

PART II - STUDENT AND OTHER HOURLY ASSISTANCE

If your library has assistance from students in the Federal College Work-Study Program, report as follows: (a) Include in Part II, Line 1 any amount that may have been allocated to the library budget from the INSTITUTIONAL funds which your institution provided for the program, and (b) Report in Part III, Line 10 the dollar value of the Work-Study student assistance. If the library has only from a student assistance program other than College Work-Study, the wages for such assistance should normally be included in Part III, Line 9. The total hours worked by student assistants in all programs should be included in Part II, Line 1.

PART III - LIBRARY EXPENDITURES EXTENDED/INCURRED, 1968-69

A. If your institution's fiscal year does not close in time to obtain audited expenditure data by October 1, please request assistance from your financial officer in providing the necessary estimates of 1968-69 expenditures, items.

B. Note that funds EXPENDED in 1968-69 from Federal or other grants (as distinguished from funds RECEIVED in 1968-69) are to be included in this Part.

C. On Line 1, include expenditures for salaries, before any deductions, of professional and nonprofessional staff of the library. Staff benefits, such as social security, retirement, pension contributions, and other "fringe benefits" paid by the institution should be excluded. Also exclude student salaries and wages (see Paragraph F).

D. Although all new as well as old buildings should be included in Part I, expenditures made in the process of building up a collection for a new or expanded library are CAPITAL, rather than OPERATING expenditures and should NOT be included in Part III.

E. The estimated value of personal services (salary equivalents) contributed by members of religious orders should be included on Line 2. Other contributed (volunteer) service should be reported on Line 11.

F. Line 1 should include expenditures made from the library accounts for binding or rebinding done outside the library. If your library operates its OWN binders, include on Line 3 the TOTAL expenditures for this operation, including those for salaries, wages, and supplies.

G. Note that Lines 8 through 11 provide for the estimated value of certain materials or services which are not charged to your library accounts. As noted in connection with Part II, enter on Line 10 the estimated value of Work-Study assistance, and on Line 11 report the value of any other type(s) of subsidized support service, specifying their nature.

PART IV - GENERAL INSTITUTIONAL DATA

A. Although the information required in Part IV concerns the entire institution rather than the library alone, such information is important for analysis of the library data, and the entire scale in this part will markedly improve the final publication.

B. The figure for Line 1 should be obtained from the institution's business officer, and data for Lines 2-4 from the chief academic officer.

PART V - LIBRARY STAFF AND SALARIES, FALL TERM 1969

SECTION A - TOTAL LIBRARY STAFF

A. In this section report all staff (including contributed-service staff) serving the library in regular positions, i.e., full-time or part-time positions functioning during at least the fall term. Also, on Lines 8, 9, and 10 report vacancies in positions budgeted for the fall term. (For definition of full-time, see Paragraph A in Section B below.)

B. For reporting purposes, PROFESSIONAL LIBRARIANS (Lines 1 through 4) are defined as staff doing work that requires training and skill in the theoretical or scientific aspect of library work, as distinct from its mechanical or clerical aspect. Note that the group designated "Heads of major library units" (Line 3) includes heads of school, college, or branch libraries and heads of major library departments or divisions.

C. PROFESSIONAL STAFF OTHER THAN LIBRARIANS are defined as persons who, though not librarians, are in positions normally requiring at least a bachelor's degree (Line 5).

D. NONPROFESSIONAL STAFF are persons in receiving, shipping, binding, secretarial duties, etc. (Line 6).

E. To compute the full-time equivalent (FTE) of the part-time staff reported in Column (3), add the hours worked in a typical week by all regular part-time staff, and divide by the number of hours in your full-time work week, round to nearest tenth of a position, and enter the result in Column (4). Complete Column (5) (FTE of total staff) by adding Columns (2) and (4). NOTE: The services of hourly employees who work only occasionally should NOT be reported here but rather in Part II, Line 1 or Line 2.

F. As appropriate, use a similar procedure to obtain, in terms of full-time equivalents, the components of Column (1) that are represented by contributed-service staff and enter this figure in Column (6).

SECTION B - SALARIES OF FULL-TIME STAFF

A. This section requests salary data for all FULL-TIME library staff members who, at the beginning of the fall term 1969, held contracts for periods of at least 9 months. Exclude staff serving full-time for less than 9 months. The definitions in Section A for types of position also apply here.

B. Report salaries in terms of contract salaries before deductions. Staff on 9-10 month and 11-12 month contracts should be entered, respectively, in the 9 and the 10 of the table. Estimate salary equivalents of continuous-service staff members (reporting them in an 11-12 month area) and report them in the 12.

C. For staff reported on each line of the table, compute the mean salary (Column (6)) by summing the salaries and dividing by the number of staff in Column (5).

D. If your institution wishes to restrict the use of salary data for a particular type of position in summary tabulations, enter an "S" on the appropriate line in Column (7) of the salary table.
